Team 15: Minutes of Meeting
Date: 08th April 2024 – Client meet 9

What we have shown:
1. We showed the API docs about all the required fields of json and methods
2. We showed the implemented Transcript page which is using a dummy json file and displaying the data.
3. We also showed the Attendance page of a student using dummy json file
4. We also showed the conditional rendering for both Student and the Faculty as well as staff dashboards according to the user login.
5. We showed the File upload for both the leave and bank details page.

Future Tasks:
1. Implement the production API's for the Attendance and My courses page.
2. Write the detailed explanation of the Transcript API description.
4. Implement the Notifications for Leave Application and Bank Details update.

Feedback from client:
1. Fix the API's doc with the updated fields for the All the remaining API's.
2. Profile page Production API is working fine and implements the bank details page with production API.
